**DEPARTMENT OF ORAL MEDICINE & RADIOLOGY**

**INNOVATIVE TEACHING LEARNING ACTIVITY- ROLL PLAY**

**Communication skills in case history taking- Roleplay**

**Learning Objectives:**

1. Understanding the importance of communication skills in case history taking
2. Acquiring communication skills in case history taking

**Facilitator faculty:** Dr Rohit Gadda

**Warm up the group:**

All students were introduced about communication skills by group discussion. They were informed about roll play activity to be carried out.

**Select participants:**

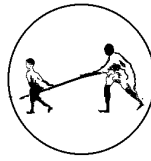

Participants for roll play were selected and given respective rolls.

**Set the stage:**

Roll play scenario was set for the activity. Scenario was to communicate with patient as patient visit the clinician with problem of severe dental pain.

**Prepare the observers:**

Students who did not participate in the role-playing scenario observed the roll players so that all members of the group became directly involved in the learning process.

#### INNOVATIVE TEACHING LEARNING ACTIVITY- ROLL PLAY

##### Enact, discuss and evaluate:

Roll play was enacted: Non-participating students were asked to report out on their reaction to the role that was played. All Students were engaged in the role-play as they have been given a direct assignment to observe and to critique player when other students were demonstrating the role-playing activity.

##### Learning outcome:

- Student's understanding the importance of communication skills in case history taking was improved which was evaluated by active discussion.
- Students acquired the communication skills in case history taking by actively participating in the roll play scenario as performing different rolls or being as an observer.
