MGM CHARITY FOR PATIENTS ABOVE 18 YEARS OF AGE

PATIENT'S EXPERIENCE: RUHI HIGH RISK PATIENT

Respected Dr. Deshpande Sir,

I would like to share my experience with you. We came to know about Ruhi's palate cleft problem after her birth. Immediately then Dr. suggested us to do the complete checkup of Ruhi for any other problems. We have done all 2 tests at Dr. Hedgeson Hospital. Arranged in which we came to know that her OHS problem is her cleft palate at her age of 6 months.

After all these tests and collection of reports we visited a well known plastic surgeon who arranged who does the cleft palate & lip operation free of cost under a well known charity trust has done more than 1 lakh cleft surgeries world wide. He has seen all 2 reports & said after one year we can do her surgery under this well known trust. So nothing on him we didn't look any other doctors opinion. After one year when we went to him for operation as he gave us a date 1st Dec 2018. That time again he told to do some tests for it. After we did all 4 tests told by Dr. which date is 2020. After doing all 4 tests for it. He said that she has a OHS problem so do for tests of that. Will know about Ruhi's operation is not possible under any scheme. (We have to pay approx Rs 20,000 for her operation). Or else we have to do OHS closure first. After OHS closure done he said we can do it for free for OHS & OHS.

Then we met one more known surgeon in arranged for the same cause who is also working for the charity but again it some reply we got from Dr. As we are unable to pay that much amount for her operation we started searching other plastic surgeons

of arranged a consultant. But again the same reply. Not possible with any of the scheme. Then we started searching trusts something. Finally we came to know about being the poor & needy people. We mailed on their site for financial help. That time we received return mail from Mrs. Loretta Cook. Whom saying that instead of giving money they provide the proper doctor for a proper consult, and she gave name & number of Dr. Ganesh Deshpande a well known plastic surgeon in Mumbai who does only the cleft palate & lip surgeries at NRI's Hospital, Khar, Mumbai free of cost. Then immediately we had a talk with him, told him all our problems. He gave us appointment for surgery. And really he did Ruhi's operation free of cost under Jain Health Foundation & Operation Smile Foundation. So he said he wanted to see the successful surgery of my daughter. Now she is absolutely fit & fine.

We stayed at NRI's Hospital, Khar from 10th March 2018 to 15th March 2018 & everything was free of cost which includes travel allowance, food, stay, operation charges, medicine etc.

So we really thankful to Jain Health Foundation, Operation Smile Foundation & the main Dr. Ganesh Deshpande for starting such a wonderful cause to help ordinary people of India.

Thanks,
Regards,
Mrs. Loretta Cook
(My Beneficiary Doctor)
